Accelerate

Our **Accelerate** program is designed for farms who want to rapidly maximise their potential through pathogen detection, disease mitigation and breeding programs. **Accelerate** programs run for 12-months and are open for small to medium-sized farms with each program tailored to suit your farm's goals.

Accelerate Approach

Our customized approach focuses on rapidly assessing your farms potential and providing expertise to maximize performance.

Accelerate can help increase market share, predictability in farm performance and provide a competitive advantage.

Accelerate offers a holistic approach to your farming with ongoing KPIs that can help attract premium prices.

Farms that qualify for the program have an opportunity to use **Accelerate** branding adding further credibility to your organization (conditions apply).

Game Changing Technology

Underpinning Genics' **Accelerate** program is Genics solutions suite including Shrimp **MultiPath**, Shrimp**ID** and DeepDive Histopathology. Our technology is the most sensitive data-driven management tool in pathogen detection and breeding selection available. As an **Accelerate** participant, you'll have access to this game changing technology placing your farm alongside the best in the world.

Tell your customers

As a participant in the program you will be granted unique access to use the **Accelerate** logo. This means you can share with customers your journey of improvement and excellence.

Visit www.genics.com/accelerate for more information.

Genics Accelerate Programs are custom designed and not suitable for all organizations. Minimum testing requirements are required with a commitment to annual programs.
