Pork MultiPath Plus™

Pork MultiPath Plus™ supports proactive herd-health surveillance through the co-detection of multiple respiratory and enteric pathogens. Sensitive and specific molecular testing provides veterinarians and producers with clearer data to assess disease risk, guide management decisions and support responsible antimicrobial use.

With **PRRS virus detection included**, Pork MultiPath Plus™ delivers broad pathogen visibility — helping identify potential health challenges before their full impact is seen across the herd.

Pork MultiPath Plus™ is the ultimate early warning system against pathogens

Genics' PRRS virus detection capability is validated using characterised samples from the United States

Detects multiple respiratory and enteric pathogens in separate MultiPath™ tests as listed below

Includes controls to validate every test result and quantify infection severity

Includes control tests to validate RNA and/or DNA sample integrity

Rapidly generates results on large numbers of samples with fast data turnaround times

Data Security: Genics maintains strict client confidentiality of all test results. For more visit www.genics.com/privacy/

Respiratory Pork MultiPath™ detects and quantifies:

- Porcine reproductive and respiratory syndrome virus (PRRSV)
- *Actinobacillus pleuropneumoniae* serovar 1, 5, 7, 15 (APP1, APP5, APP7, APP15)
- *Streptococcus suis*, serotype 2, 3 (SS generic; SS2, SS3)
- *Pasteurella multocida* (PM)
- *Glaesserella parasuis* (GP)
- *Mycoplasma hyorhinis* (MHR)
- *Mycoplasma hyopneumoniae* (MHP)
- Porcine circovirus 2 (PCV-2)
- *Klebsiella pneumoniae* (KP)
- *Bordetella bronchiseptica* (BP)

Enteric Pork MultiPath™ detects and quantifies:

- Porcine reproductive and respiratory syndrome virus (PRRSV)
- *Lawsonia intracellularis* (LI)
- *Brachyspira pilosicoli* (BP)
- *Brachyspira hyodysenteriae* (BH)
- *Salmonella enterica* (SE) incl. serovar Typhimurium (SEty)
- *Escherichia coli* (EC) incl. F4, F5, F6, F18, F41, LT1, ST1, ST2, STX2e, eaeA
- Porcine rotavirus (RV) RVA, RVB, RVC
- Porcine circovirus 2 (PCV-2)
- *Clostridium difficile* Toxin A & B (CDA, CDB)
- *Clostridium perfringens* Toxin B (CPB)

Head Office

Suite 14, 220 Boundary St, Spring Hill
Queensland 4000 AUSTRALIA

Pork MultiPath Plus™ Compatible Sample Types

Lung, tonsil and intestinal tissue

Nasal and rectal swabs

Pooled oral fluid rope samples

Feces samples

Pooled feces sock samples

eDNA and water samples

Bioaerosol samples
